

BEYOND

BEYOND THE [PREVIOUS]
REALMS OF POSSIBILITY

FAST.
SPOT-FREE.
SOLVENT-BASED.

**THE NEW GENERATION OF PART CLEANING
WILL SOLVE YOUR CLEANING PROBLEM AS WELL.**

BEYOND

Amazingly adaptable:

BEYOND provides a freely scalable cleaning process which can be adapted to almost any cleaning task and machine size.

Cleaning technology redefined

The new solvent cleaning by EMO and Hösel gets to the core of it: BEYOND is the logical next step to the development of the EMO VAIOS- and Hösel SOLVACS-technology. It provides new possibilities between the conventional use of solvent or aqueous cleaning in separate systems and the combined use of these media in a HYBRID system.

BEYOND is extremely fast, naturally spot-free, and suitable for both organic and inorganic contaminants. It is ideal for a variety of common cleaning tasks where every second counts even when dealing with the toughest contaminants.

The perfect complement: The BEYOND cleaning process

Organic contaminants

[non-polar / non-water soluble]
e.g.: oil / grease / wax / petroleum

Inorganic contaminants

[polar / water soluble]
e.g.: emulsion / salt / abrasion / fingerprints

To be cleaned with

To be cleaned with

Chlorinated hydrocarbons [CHC]
e.g. perchloroethylene, trichloroethylene

Hydrocarbons [HC]

Mixtures [MA + HC]

Modified alcohols [MA]

Water-based cleaning

BEYOND cleaning process

HYBRID cleaning
